

ON-SITE
Aircrew
Combative
Training

Aircrew Combative Training (ACT) was designed in response to the many client requests after the tragedies of September 11th, 2001. The aviation industry demanded a simple system to overcome, subdue and neutralize inflight threats.

FACTS® has teamed with self defense training experts to develop this program for aircrew to deal with the unexpected. The **ACT** system has been specifically designed to be the most effective method available considering the limited space and resources of a corporate aircraft.

The **ACT** system is the **ONLY** program utilizing full-size cockpit and cabin simulators to train in the "real" flight environment. The skills are easy to learn, simple to execute, easily retained and proven effective in close quarters confrontations.

The fighting system has been field tested and proven effective by government, law enforcement, security forces, and crewmembers throughout the country.

At the completion of the **ACT** training program, you will have a heightened awareness of your safety and security and a new confidence in your ability to handle threats.

Program Outline

Intro	Hands-on Practice (<i>Simulators</i>)
Security Mindset	Unruly PAX
Risk Assessment	Inflight Cabin Threat
Threat Profiles	Inflight Cockpit Threat
High Stress & Decision making	Crew Assault
Basic Strikes	Street Threats
