

# InFlight Emergency Medical and Defibrillator Training

AirCare's intensive one-day *InFlight Emergency Medical and Defibrillator Training* provides the crewmember with what they need to know to properly assess, treat, and care for ill or injured crew and passengers until higher levels of ground-based assistance is available. The program trains practical, useful, first aid skills with considerations of time, space, and the altitudes in corporate aircraft. Hands-on emergency medical procedures are practiced either in the client's aircraft or one of the **FACTS**<sup>®</sup> full-size, full motion, cockpit and cabin emergency procedures simulator.

## Course Description

### INFLIGHT EMERGENCY MEDICAL AND DEFIBRILLATOR TRAINING (1 DAY)

For pilots, flight engineers and flight attendants. The intensive one-day (8 hrs) training program is designed specifically for aircraft crewmembers. The training program follows best medical practices, nationally accepted training programs, and industry standards for the care of in-flight medical problems, including O.S.H.A. bloodborne pathogen requirements, CPR and the use of automatic external defibrillators (AEDs). The program includes lecture, demonstration and ample hands-on emergency medical practice in the corporate aircraft environment.

### TRAINING INCLUDES

- |                               |                                  |
|-------------------------------|----------------------------------|
| O.S.H.A. Bloodborne Pathogens | CPR                              |
| Patient Assessment            | FBAO/Choking                     |
| Crew Coordination             | Defibrillation (AED)             |
| Altitude Considerations       | Common InFlight Medical Problems |

*Includes emergency crew resource management and coordinating assistance from ground-based assistance service providers.*

**On-Site Training is available at the client's facility or at any **FACTS**<sup>®</sup> Training class throughout the U.S.**

### Other Courses / Products / Services Available

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                   |
