

Crewmember Emergency Training

FACTS SOS™ Training

FACTS® Training has been providing emergency training for pilots, flight engineers, flight attendants and executives for over twenty years. FACTS programs focus on the hands-on skills necessary to build confidence, manage and survive emergencies, including aircraft evacuations, ditchings, and survival in extreme environments. Survival skills and emergency procedures are practiced using typical emergency and survival equipment found aboard the corporate aircraft. Hands-on exercises are conducted in the pool, the dunker, and open water.

A FACTS certificate of training is issued to those crewmembers successfully completing the program.

DITCHING & OPEN WATER SURVIVAL TRAINING (2 Days)

For professional crewmembers on any aircraft. An intensive two days (20+ hrs) of emergency procedures and survival training in the classroom, pool, and the open water, including day and night open water training and survival.

TRAINING CURRICULUM INCLUDES:

DAY 1

Planning, Preparation and Practice
ASSET™ Aircraft Survey - *Optional*
Cold/Warm Water Survival
Survival Equipment
Rescue
Raft Exercise (*Open Water*)
Night Sea Survival (*Open Water*)

DAY 2

Rescue Resources
AMVERS
Inverted/Submerged Aircraft Emergencies
Underwater Egress Training

Water Exercises:
Underwater Egress
Dunker Exercises (*Pool*)

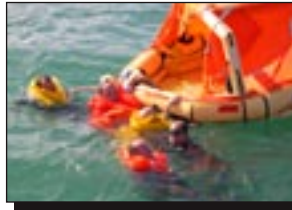

This intensive two-day open water training is conducted in water bodies near your flight department (subject to availability). The comprehensive training program can be customized for the client's aircraft type, specific equipment, operations, and, can often times be coordinated with a variety of local emergency services providers, e.g., Coast Guard, Law Enforcement, Fire/Rescue, etc. to compliment the training, and to provide the students with "real-life" rescue situations.

The training includes hands-on drills in the classroom, the pool, and the open-water, using aviation-specific equipment and procedures to increase survivability in water survival emergencies.

FACTS SOS™ TRAINING Details • Details • Details

While the **FACTS Open Water Survival Training** is a valuable learning experience for corporate crewmembers, the added success of this type of training requires detailed coordination and cooperation with local emergency and rescue services personnel.

Training may be coordinated with local Emergency Medical and Fire/Rescue Services, Coast Guard, Law Enforcement, etc.

We are usually successful in getting local emergency services help in conducting a quality training program, which benefits both the crewmembers AND the assisting rescue organization.

- FACTS Provides:**
- Student Manuals/Training Materials
 - A/V Equipment
 - Survival Kit / Equipment
 - Life Vests
 - Corporate-style Life Raft*
 - FACTS Inverted Underwater Dunker

** Generic corporate life raft(s) are used for training. Aircraft-specific raft(s) for deployment and training can be rented and provided at the client's expense.*

- Client Provides:**
- Classroom/desk seating for students with whiteboard
 - Access to swimming pool (indoor during winter) - Min. 5 ft. Depth
 - Access to aircraft for equipment survey and evacuation drill - OPTIONAL
 - Assistance (liaison) with coordination of local emergency services

- Additional Client Costs:**
- Trainer travel expense
 - Equipment Shipping
 - Boat/platform rental, as needed
 - Standby/Safety boat(s), as required
